

PROJECT ENGINEER (UK)

If you are interested in joining an exciting company within Europe's largest industry, then SF Engineering may be right for you. As one of Europe's leading manufacturers of products and solutions for the global food industry, a career at SF is beyond what you would expect. At SF we realise that our employees are one of the keys to our success and this has been recognised with three awards at the 2018 Huntingdonshire Business Awards. We look for individuals who share our passion to succeed.

As a leader in our field, we are growing rapidly and have a number of exciting positions available, including the role of **Project Engineer**. Reporting to the UK Engineering Manager, we are seeking an ambitious and experienced candidate who will add value to the Projects team.

This role requires someone with a strong engineering background and customer facing personality. This role will be a key part of the engineering team and will be integral to the continued growth of the business.

Responsibilities (not limited to):

- Takes ownership of allocated projects from order to delivery - provides technical support to all teams within SF throughout project timelines
- Manages customer and internal sales relationships and expectations for smooth project delivery - identifies and takes contingency action, where required
- Uses knowledge and experience to produce layout drawings - identifying and specifying all mechanical/electrical components within the scope of project
- Manages stakeholders external and internal - ensures compliance with specified project budgets and risk assessment protocols
- Uses expertise to support technical issues and develop project process – takes ownership for documenting full traceability
- Throughout lifetime of project, proactively identifies any changes to the original scope of supply
- Uses knowledge for interrogation of product design – identifies and documents cost savings, lean manufacturing/process improvements
- Takes full responsibility for project audit process

Person:

- Strong communication, analytical and influencing skills
- Proven experience in a Project Engineering position
- Professional, confident and mature attitude
- Methodical working approach
- Strong customer facing personality
- Ability to create AutoCAD and Solidworks drawings
- Experience in the food industry, or food industry equipment an advantage
